From Brownsville, Texas
August 6, 2003

The terror campaign continues in full swing. The most recent events include the following: T visits Matamoros, Mexico and enters a commercial internet access business; shortly thereafter the fbi sends a drunken Mexican male (of the size and conduct reminiscent of M1- as described in many of these updates). The drunken md attempts to provoke T into a fight, but becomes the object of attention when T's associate and amiga engages him in light conversation in a most charming manner. The little one then slivers off to his bar across the street where the Handler's assistant awaits with more instructions. About an hour later, as T tries to leave, the drunken one returns a second time to attempt to provoke T into a fight; this time the fool attempts to block T's entrance into T's vehicle. T avoids violence and the little one again crawls back into his retreat.

Home invasions, psyops, psychotronics, complete electronic and physical surveillance also continue. Poisonings continue with greater intensity and with more severe consequences because the fbi now engages doctors to inject directly into T's blood the harmful drugs. T receives treatment from a doctor and a dentist as reflected in the medical summaries shown below. Subsequent to the treatment T notices severe symptoms (similar to those previously reported); also, the fbi sends T the usual notice that T was just poisoned shortly after the visits to the doctors. Then, on July 30, 2003, the fbi enters T's residence, reviews the contents of T's present rough draft update to this site and places into the trash the two documents shown below. The fbi also destroys the curtains in the kitchen as a reminder to T that his efforts to document the poisonings are unacceptable. Conditioned response techniques continue to be employed against T even though to date the techniques fail to control T.

The following medical documents were provided to T by the doctors. The statements in this update represent the opinion of Geral W. Sosbee and are not accusations against any person. However, any doctor, dentist, or other health care provider, who injects T with a poison/drug/medication at the direction of the fbi/law enforcement, or court order is in my opinion a criminal and a coward; such doctor or lay person is also a mental punk and a md for selling out his/her own powers of reasoning and good sense in return for the favors/good graces of the perpetrators of offenses reported in this website over the past several years (presently, T notes that the fbi campaign to imprison, drive insane, or kill him is now in the sixth year, around the clock and around the world). The actions of theses doctors are the more reprehensible because they enjoy a position of doctor-patient trust in a monopolistic profession which is now become in many instances an instrument of tyranny and oppression. The doctors and others are therefore partly responsible for the possible breakdown and death of the individuals targeted for termination. <u>These health care providers are (like their mental dwarf handlers) the lowest form of human intellect for prostituting their skills and licenses to the terrorists in the United States government. For this, the doctors cannot be forgiven. They have ruined their profession and caused great suffering and no doubt many suicides, even while their fbi commanders look on in real time.</u>
The medical documents are reproduced below:

PATIENT: Geral W. Sosbee
ACCT #: SG0830

PROGRESS REPORT

(L) hand dominant

6/13/03 57 y.o. ♂ developed stiffness (L) hand x 2 months since getting a motorcycle

PMHx ∅.

OIE

7/2/03 patient has some relief ~~any~~ Mobic, but still has triggering in D2, D3. have suggested injection of 3rd finger. patient would like to proceed.

℞ 40m depomedrol/xylocaine injected A1 pulley

℞ Feldene 20mg p.r.n. + Mobic 7.5 b.i.d

Special Note:

In 1999-2000, T visits the office of another dentist as shown in the records below; following the visit T discovers the possible implantation of a tracking device as evidenced in this website. The records from the dentist are as follows: (click here to see evidence of the tracking device that Stefan Zweig placed or allowed to be placed in Sosbee).

Name _____ No. _____
Dr. Zweig Date _____

DENTSPLY RINN PART#21-6081

McCormack
Dental X-Ray Laboratory
408 S. Rosemead Blvd.
Pasadena, California 91107

Steven Zweig, D.D.S.
Endodontics
1344 Granada Avenue
San [illegible] 91108

G.W. Sosbee
5042 Wilshire Blvd # 15
LA, CA 90036

X-RAYS
PLEASE DO NOT BEND

Special Notation: T notices that he fell asleep during a recent dental treatment and that the tracking device implant may have been removed or otherwise manipulated/replaced. In any event the irregularities of some procedures in the dental chair (such as possible poisonings, etc.) suggest that the fbi and the cia have total control over doctors whenever needed. Dr. Castillo permitted the fbi to do whatever the fbi pleased during the visit in which Castillo induced sleep in patient Sosbee as directed by the fbi. Then, presumably Castillo left the room until the fbi operative dentist was finished. Sosbee is certain (IMO) that during the visit to Castillo's office, the dentist (Castillo) induced sleep and allowed the fbi operative-dentist to perfom a variety of invasions of Sosbee's person. Click here for evidence of this.

August 30. 2003
From Matamoros, Mexico

The mental dwarfs of the fbi continue their desperate antics in efforts to silence, arrest, drive

insane, or kill T. Increased psychotronic assaults both n Brownsville, Texas and in Matamoros, Mexico, continue as T seeks temporary refuge in Mexico in efforts to find a place to sleep free from the assaults. The fbi transmits the ELF (or similar electronic weaponry) into the Matamoros dwelling where the hostess is also prevented from sleeping. The psychotronic assaults continue all through the night and into the next day. The thugs also begin the destruction of Amiga´s car each time that T rides in same. Also, the mental punks use other psyops maneuvers to dissuade amiga from association with T. The little ones continue the usual cover research activities, including messagings, threats, theft of personal property, etc. T is in good spirits and is as always privileged to present this update.
Geral Sosbee

On the evening of the August 30 -31, 2003, update and in apparent response to the same update the cowardly hooligans of the fbi boldly unlock the pad lock on the gate of amiga's casa.
