

This update to My Story has two purposes as follows:

First, I document action against me by a military science professor for sending my message to CSUN. Currently the University of Texas is considering the report from the professor of military science who reported me incorrectly for harassment. Also, note that all of my efforts to communicate via e-mail with anyone at the Northridge campus is now blocked by the ROTC/military science department; however, some of the faculty and staff have shown an interest in my work (see *site meter image at the end of part one); therefore, I consider the action by the ROTC chief as an overkill.

Additionally, inasmuch as the fib/cir destroy any computer that I may own, I must frequent the public library (such as the one at the University of Texas) in order to access the internet; so any possible action by UT against me may be detrimental.

Secondly, I summarize below the effects of the directed energy assaults on my person.

Part 1) An official at California State University, Northridge responds negatively to my message as shown below.

"Your IP address has been reported to your ISP for harassment.
Have a nice day,
-James Wolf
Website Administrator"

Sosbee's response to the above notice:
to James Wolf profmilsci@csunrotc.org
from sosbee: you are a cowardly punk.

.Second message from CSUN to Sosbee:
On Tue, Aug 18, 2009 at 7:51 PM, <profmilsci@csunrotc.org> wrote:

"Mr. Sosbee
Your IP address "129.111.96.123" has once again been reported to your ISP for harassment and this and future email addresses used have and will be blocked from our email system. Additionally the University of Texas San Antonio has been contacted with your name and information and alerted to the use of their computers for harassment purposes on your behalf.
Have an outstanding day,
James Wolf
Website Administrator"

Part 2) The United States of America engages in a kind of siege of the * Site meter image showing interest by other CSUN staff in my work:

brain as described below (and at many other pages of this website) , while the subject of the brain attacks is often confounded by the effects thereof and by the general lack of interest on the part of educators, police, lawyers, doctors, government officials, etc.

As of today, August 19, 2009, I can verify the following symptoms associated with the directed energy assaults against me, (i.e.: the Target): This information is not all inclusive, but represents a summary:

The primary problem I have with the assaults is the entrainment of the brain 24/7, especially noticeable at night when I try to sleep. The psychoelectronic assaults engage the brain, or the consciousness and prevents REM (or meaningful) sleep; I apparently drift briefly out of consciousness throughout the night for short periods of time (one to two hours, typically) and I usually manage to get out of bed 10-15 hours later, but still totally exhausted and sleepy. The assaults are continuous 24/7 without interruption or respite, so efforts to grab sleep during the day are futile. No defense exists to the assaults and no matter how much I try and need to sleep, the sleep deprivation continues (now into about the 5th or 6th year around the clock. [The fbi/cia's Nonconsensual Cover Research and Human Experimentation on me also now extends into the 11th year]. I consider the program against me as exemplary of de facto torture.

Additional Symptoms The Target experiences: severe sleep deprivation (causing the Target to stay in bed often 10-15 hours a day), continuous sleepiness 24/7, mood swings & irritability, bee-type stings on arms and legs (and sensation of being touched, sometimes resulting in involuntary scratching & breaking skin), episodes of nausea, headaches (alternating sharp & dull with occasional migraine), heat sensation in upper left quadrant of head, hyperactive mental state 24/7, frequent & extreme lethargy, rare piercing left ear ache, respiratory problems, indigestion and acid reflux, tinnitus with pressure sensation in head 24/7 and with no respite, but with the presence of a stereo effect of tinnitus with the sound in both ears like crickets chirping at wav, 44100Hz, 1411kbps, at once.

Overall, the assaults may be designed to drive the Target..... M A D .

END. Geral Sosbee
